Nominated by Acclamation.

WILLIAM MAHONE, REPUBLICAN CONDI-DATE FOR GOVERNOR OF VIRGINIA. The prettiest political fight of the com-Mahone, and Mahone says he is sure to defeat them, and where both parties will do the best they can to make good their respective prophecy. William Mahone is a clever party manager and indefatigable worker. He was born in Southampton, Va., in 1827, graduated from the Virginia military institute at the age of twenty, and became a civil engineer and constructor of the Norfolk and Petersburg railroad. Mahone served in the Confederate army, having raised and commanded the Sixth Virginia regiment, and afterwards being promoted to the rank of brigadler-general and majorgeneral. At the close of the civil war he returned to his old pursuits, and in a few years became president of a trunk line from Norfolk into Tennessee. In state politics he became a Readjuster, and thus was brought into affliation with the Republicans, by whose help he was elected United States senator for the six years ending in March, 1887. For some time past he has been chairman of the Virginia Republican state committee. He resides at Petersburg, Va.

A Sure Thing.

JOSEPH G. HUTCHISON, REPUPLICAN NOMINEE FOR GOVERNOR OF IOWA. Joseph G. Hutchison was born in Northumberland county, Pennsylvania, September 11, 1840. He was graduated at Dickinson seminary, Williamsport, in 1862, and a few months later enlisted in defense of his country as a private in the One Hundred and Thirty-first Pensylvania volunteers. The young soldier participated in the hard service and fierce battles of the Army of the Potomac, serving the full term of his enlistment and was honorably discharged, bearing the rank of captain. After the war he entered the Union law school at Cleveland, Ohio, and upon his graduation removed to lowa, in 1865, where he made Ottumwa his residence. His experience as a legislator had its beginning in the Eighteenth general assembly, to which he was elected in the most triumphant manner. Twice after that he served his county and state in the higher capacity of senator. He was one of the most prominent men of the Nineteenth, Twentieth, Twenty-first and Twenty-second general assemblies. Upon the election of Mr. Larrabee to the governorship, Mr. Hutchison was the the almost unanimous choice of his fellow senators for the chairmanship of the committee on ways and means, the most important committee of the state legislature. The policy which finds Iowa out of debt, in spite of large expenditures of funds for needed state institutions, has been vigorously supported by Mr. Hutchison, to whom his fellow-citizens give most of the credit due for its successful employment.

The Browns. Brown has a home full of girls and boys, Rosy and healthy and full of noise. They are sprightly at work and bright at their And are inoted for smartness and wit and gond looks. Brown is healthy, his wife is fair, And their faces are free from wrinkles of

They spend memoney for powders and pills, And nevers dellar for doctor's bills. The reason is that they begin in the right place.
Dr. Pierce's Colden Medical Discovery, by keeping the strings of Lepure, the blood free from impurities, wards off all those diseases which n bad bloods. The use of the "Dis-revents liver and kidney troubles, dyspepsia, consumption or ling scrofula, stomach and bowel troubles, and porestalls the beginning of disease. That is why the Browns are so healthy. It is also guaranteed to cure these allments if taken in time and given a tair trial, or

## ON 'CHANGE.

Spot Cotton Lower at Liverpool but Unchanged at New York.

New York Futures Close Higher-Wool Dull. The Eull Movement in Wheat Still Continues-General Markets.

Daily Review.

OFFICE OF THE GAZETTE. Fone Worth, TEX., Aug. 27, 1889. The weather continues bright and pleasant and business in all branches is picking up. Wholesale merchants are getting good orders from their country customers and the retail men report more activity than there has been for several weeks.

Business for the seven day period closing with to-day has been moderately good, gradually growing better each day. The fact that a good cotton crop ing fall will be in Virginia, where the is assured, backed by a fine grain crop, Democrats claim to be sure of beating has given every one confidence and there is no doubt that the coming fall and winter will be the best that North Texas has experienced in a business way for years. There has been but few balles of cotton on the market up to this time, but the staple is good and it readily commands 10 cents.

There has been and is yet a good market for all kinds of products at fair prices, in fact they have held up better this reason than for years past. Prices are but little changed from our

last report, and at the close of the market to-day were as are given below.

IMPORTS AT NEW YORK. The imports of foreign dry goods into the port of New York for the week ending August 22, 1889, and since January 1 for the last three years were as follows:

Entered at port.... \$2,946,861 \$2,445,940 \$3,283,274 Thrown upon m'k't 2,834,970 2,779,462 3,145,181 Ent'd for con'pt'n 2,321,742 2,651,747 2,650,980 IMPORTS OF DRY GOODS SINCE JANUARY 1.

Entered at port. \$83,011,112 \$87,042,777 \$90,997,519 Thrown on m'kt 81,718,149 \$5,884,135 90,708,010 From the above it will be seen that the imports of foreign dry goods at this port for the week amount to \$3,283,274, showing an increase of \$301,210 as compared with last week, and an increase of \$837,
with last week, and an increase of \$837,-334 as compared with the corresponding | ter-gallon cans, per dozen, \$400. week last year. The total of goods marketed for the week has been \$3,145,-The total imports since January 1, 1889, bave been \$90.397.519, against \$87.042 have been \$90,997,519, against \$87,042, 777 for the same time in 1888, or an increase of \$3,954,724.

COTTON MANUFACTURE IN BRAZIL. The manufacture of heavy brown cotton goods in Brazil is developing gradually and successfully, says Industries. Even now both Great Britain and the United States of North America are considerably injured in their sales of such goods. It is feared, when the manufacturers in Brazil have attained a little more skill and perfection in this industry, that their goods will drive all others out of the native market. And this observation applies almost equally to all other kinds of cotton products. The raw material in use in the empire is brought from Pernambuco, and costs about 11 cents per pound at the mills at Rio Grande do Sul. The retail price of one meter of brown sheeting, smoothly and evenly woven, of a weight per meter of 240 grammes, and of a width of thirtythree inches is 16 cents. The price of the heavy cotton is about the same figure, but their breadth is less than that of the sheeting. The mills at Rlo Grande do Sul are very prosperous. Last year they made improvements on an extensive scale, and yet were able to pay the shareholders a dividend of 16 per cent. At present the United States are very successful in supplying bleached and brown muslins and double-width bleached cotton sheetings. The price of the lastmentioned class of goods is about seventy cents per yard, and this limits their sales, being considered too high.
